PLENTY OF MONEY IN SIGHT

THIS TIME THE TROUBLE IS LACK OF BUSINESS.

New York, Feb. 10.-The activity in stocks which revived towards the end of last week was notably extended today in linety days, 4 per cent; six months, 41/2 the form of selling orders and a deep cut per cent. was made in the formerly prevailing level of prices in the course of the day's operations. Stocks were industriously pressed for sale from all sides and as the demand was quite inadequate to absorb these sales there was a rapid decline in prices, with only occasional check, caused by the operations of professional bears. by the operations of professional bears.
There was no striking new item of news to account for the apprehensive spirit reflected in the action of the market, but there was a pronounced growth of the spirit clearly manifest. This was due to a cumulative effect from misgivings felt for some time, while the influence on the spirit clearly manifest.

New York, Feb. 10.—There was quite a sharp decline in the London tin market, spot closing at £127 15s and futures at £128 Locally the market was dull, with a cumulative effect from misgivings felt for some time, while the influence on prices was aggravated by the sudden abandonment of a position on the long side of the market which had been persisted in by a speculative element. That element has been hopeful that the episode of last fall in the country's finances was due to causeless fears and misconception of the true strength of the banking position and that its effects on gening position and that its effects on gen-eral trade and business were immediately to pass away with the demonstration the causelessness of the fears which prompted what was in effect a universal run on the banks of the country. It is a trial to the faith of those looking for this quick revival of industry when the money situation has become normal again to face the returns of continued at its to face the returns of continued shrink age in railroad traffic, reduction of factory forces and general lethargy in de-mand for products. The resulting dis-couragement is having the effect of driv-ing some of the former hopeful speculat-ors to the other extreme, where they pro-fess to see only gloom and prospects of fess to see only gloom and prospects of an indefinite prolongation of the depres-sion. Such a position is quite character-istic of a large class of speculative op-

The impression of hostile influences on the side of politics was heightened by the official recommendations for greater rigor in the collection of the stock transfer and franchise taxes in New York state. Declining railroad earnings brought into question future dividend disburse-ments. The shrinkage in profits also adds to the importance of the large financing which presses upon many corporations

The Friday sale of New York City eral weakness. The principal sufferers in the day's losses were stocks which have been favorite mediums for a previous speculation for a rise. Some of the day's declines outside of these will be found moderate.

GRAIN AND PROVISIONS.

Chicago, Feb. 10.—The wheat market opened weak on general profit-taking, which was based on declines in European markets and on the bearish character of the weekly statistics. World's shipments were more than 500,000 bushles in excess of what had been estimated and the amount on passage increased 3,512,000 bushles. There was a mild rally during the first hour, due to covering by shorts, but the market again weakened about the middle of the day and sentiment continued bearish the remainder of the session. The heavy tone of the New York stock market had a depressing influence late in the day. The close was weak.
